

designer PORTFOLIO

Introducing talented and successful designers who have an eye for creating interiors that reflect your personal style.

DE-SPEC

De-spec is an award-winning design practice with a focus on the relation of space and its occupant where the design process starts with the interior and the architecture capsule its essence.

De-spec is primarily focused on the experience, working the domain of the "lived space" the approach is based on the design as part of a lifestyle.

Space is choreographed to produce the desired experience, and so in essence "experience" is designed. Instead of designing the object and the container from the "bird's eye view", the project is explored from within, striving to define the "inside out" as the very essence of space and experience.
